

**CAKIR Muharrem Okan, Dr., Londra,**

**Kingston University, Cancer Biology**

I received my BSc degree from Genetics and Bioengineering Department, University of Yeditepe, Turkey in 2015 before completing MSc in Drug Design and Biomedical Science, Edinburgh Napier University where I worked on androgen receptor variants in castrate resistant prostate cancer(CRPC). I have been mainly involved in biomedical research in cancer genetics and cancer drug discovery. Since 2019, I am doing postgraduate research in Anatomy, Physiology and Pathology at Kingston University, London. My main research interests are HPV Related Cancers and Genome editing.
