

GOKMEN-POLAR Yesim, Assoc.Prof.Dr., Atlanta, Georgia, USA

Emory University School of Medicine, Department of Pathology and Laboratory Medicine

Dr. Gökmen-Polar is an Associate Professor in the Department of Pathology & Laboratory Medicine at Emory University School of Medicine. She is a member of the Discovery and Developmental Therapeutics Research Program at Winship Cancer Institute. Dr. Gökmen-Polar earned her PhD in Molecular Biology & Genetics from Bogazici University, Istanbul, Turkey. She completed her postdoctoral training at the Sealy Center for Cancer Cell Biology, University of Texas Medical Branch, Galveston, Texas. She has established laboratory models for acquired resistance in breast cancer and thymic malignancies, which has allowed for both identification of novel targets and validation of novel targeted therapies and provided the basis for clinical trials of novel therapeutics. She has developed, validated, and patented gene signatures for Thymoma and Breast cancer. Her lab focuses on the application of multi-omics technologies in preclinical models as well as patient cohorts to identify novel therapeutic targets and overcome resistance to standard of care in breast cancer. Dr. Gökmen-Polar is an active member of the American Association for Cancer Research (AACR), American Association of Clinical Oncology (ASCO), and United States & Canadian Academy of Pathology (USCAP). She has served on grant review panels for funding agencies including CDMRP Breast Cancer Research Program. She is the co-Editor-in-Chief of Cancer Treatment and Research Communications (CTARC) and serves as an Editorial Board Member for Clinical Breast Cancer (CBC) and an Advisory Review Board Member for Translational Oncology (TRANON).
